## **Clearing Snow Around Meters, Transformers and Hydrants**

The employees of Delano Municipal Utilities wants to thank you for clearing the snow around your electric and water meters. This helps our meter readers have a clear access and makes meter reading time faster.

This is also a reminder about the importance of clearing the snow around the transformers and fire hydrants. In the event of an outage or fire, clearing the snow from around transformer and hydrant will minimize outage time and possibly save property and lives.

Your help and cooperation in these matters are greatly appreciated.
