

EXHIBIT "A" – POWER SUPPLY COST RIDER

(APPLICABLE TO ELECTRIC UTILITY RATES 2023 - 1, 2023 - 2, and 2023 - 3)

There shall be added to or deducted from the net monthly bill \$ .00001 per kilowatt hour for each \$ .00001 increase above or below the estimated monthly average new cost of power supply delivered to the customer, i.e., power supply from Central Minnesota Municipal Power Agency plus local production plant costs of providing for standby and emergency services.

Purchased power bills from Central Minnesota Municipal Power Agency for power, energy, and transmission service and/or any local production plant operating costs or operating costs from any additional suppliers shall be added together to arrive at total cost of power supply and that combined cost shall then be divided by the net kilowatt hours billed to the consumer to arrive at average net cost of power supply.
